THE

IMPROVED

POCKET RECKONER,

FOR

TIMBER, PLANK, BOARDS, SAW-LOGS,

WAGES, BOARD,

DISTANCES ON THE CANALS,

INTEREST, &C.

BY EDWARD DOYLE.

NEW YORK:

JOSEPH H JENNINGS, PRINTER, 122 NASSAU STREET.

1847.

Entered according to Act of Congress, March, 1847,
BY EDWARD DOYLE,
In the Southern District of the State of New York.

P. 2

PREFACE.

THE following extract from a letter received from Jonathan Child, Esq., late Mayor of the city of Rochester has induced me to offer to the public a Second Edition of my Pocket Reckoner.

“For the last three years I have been extensively engaged in the Saw-mill business, requiring the use of a log book; not being able to find any of yours in the book stores I purchased one published by Mr. Scribner of this city; I soon found it varied from yours, and on a thorough comparison I found it to contain many errors. As the edition you published is entirely out of the market I have borrowed one for a short time, and the booksellers inform me it is very much inquired after, and that if you would get up a new

edition, a large number of them could be sold here.

JONATHAN CHILD."

"The statement of Mr. Child can be relied upon, and from my own knowledge of Mr. Boyle's qualifications as an accountant I incur in his recommendation.

WM. C. BOUCK."

The accuracy of the calculations can be relied on, as they have been tested in an extensive business for several years, and will be found very convenient to persons dealing in any of those articles, or hiring men for any purpose, as they will at all times afford a correctness not readily acquired by hasty calculation.

THE AUTHOR.

TIMBER MEASURE.

THE following Table gives the number of feet, inches and parts, contained in a stick of Timber of any dimension, from 18 to 36 feet long, and from 9 to 24 inches square.

The column on the left, from 18 to 36, is intended for the length of a piece of Timber, and the caption for the breadth and depth. Example—A stick of Timber 23 feet long, 15 inches broad, and 14 inches thick : to find its contents, refer to the column on the left for the length 23 feet ; then on a line immediately under its dimension 14 by 15, you find the contents to be 33 feet, 6 inches, and 6 parts. Where the contents of a larger stick is required, than given in the Table ; for instance, 45 feet, take the amount of 23 and 22 feet of the dimension required, add them together, and you have the contents of a stick 45 feet long. If the breadth or depth is not on the Table, where the length is given ; for

A*

© 3-3-43 A.M.

instance, 10×8 , take the amount of 10×16 of the same length; as 10×16 is twice 10×8 , you have only to divide 10×16 by 2, and you have the quantity contained in a stick of 10×8 . Where neither the breadth nor depth is in the Table; for instance, 7×8 , find out the quantity in a stick of the same length, 14×16 , divide them by 4, and you have the contents required.

The contents of a stick of round Timber, when squared, can be ascertained, with a small variation, by the same Table. Where the stick is of equal diameter, gird it in the middle with a small cord, and take 1-5 of the girt for the square of the side; where it is tapering, gird it in two or more places, and divide the sum of the girt for the mean girt, which when found, 1-5 will be the side of the square, the contents of which will be nearly the same as a stick of square Timber of the same dimensions.

SAW-LOGS
REDUCED TO
BOARD MEASURE.

SAW-LOGS REDUCED TO BOARD MEASURE.

The following Table gives the quantity of Boards produced from a Saw-Log of different dimensions. Example—I sell to a miller a Log 15 feet long, and 18 inches diameter at the small end, at a given price per thousand feet, board measure: to find the quantity of boards produced from a Log of that size, refer to the column on the left, and find the length 15 feet; and under the diameter 18 inches, you find the quantity to be 184 feet; fractions omitted.

BOARDS AND PLANKS.

The following Table gives the number of square feet and inches contained in a Board one inch thick, from 10 to 20 feet long, and from 6 to 24 inches broad; and from 21 to 55 feet long, and from 12 to 20 inches broad. The column on the left, is the length, and the caption the breadth in inches; under which, and opposite to the length of a board, you have its contents in feet and inches. Example—Require the contents of a Board 35 feet long and 20 inches broad; by reference, you will find it to be 58 feet, 4 inches.

In measuring Boards, it is not customary to add the extra inches in length; but where ship or other long and thick plank is measured, it makes an essential difference, which, however, in some measure may be remedied, by omitting all under 6 inches over the foot, and calling all over equal to a foot—in a large quantity, the difference will be trifling.

TABLE
OF
WAGES AND BOARD.

E

TABLE OF WAGES AND BOARD.

The column on the left shows the number of days; the caption the rate per month. To find the amount of 16 days works, \$10 per month, you trace the number of days to 16; follow the line until it is under \$10, the rate per month, and you find \$6,16, omitting the lesser fractions. That for Board in the same way. The wages are cast at 26 working days to the month, and the week's board at 6 days.

TABLE OF DAYS.

EXPLANATION OF TABLE OF DAYS.

On the left you have the month, from any day of which to compute the number of days to the same day in any other month—For example, you wish to know how many days there are from the 20 of January to the 20 of August ; by following the line January, till you are under the month of August, gives you the number of days 212, and so for other months.

TABLE,
*Showing the number of days from any day in one month, to the same day
 in any other.*

FROM	Jan.	Feb.	March,	April,	May,	June,	July,	Aug.	Sept.	Oct.	Nov.	Dec.
January,	365	31	59	90	120	151	181	212	243	273	304	334
February,	334	365	28	59	89	120	150	181	212	242	273	303
March,	306	337	365	31	61	92	122	153	184	214	245	375
April,	275	306	334	365	30	61	91	122	153	183	214	244
May,	245	276	304	335	365	31	61	92	123	153	184	214
June,	214	245	273	304	334	365	30	61	92	122	153	183
July,	184	215	243	274	304	335	365	31	62	92	123	153
August,	153	184	212	243	273	304	334	365	31	61	92	122
September,	122	153	181	212	242	273	304	334	365	30	61	91
October,	92	123	151	182	212	243	273	304	335	365	31	61
November,	61	92	120	151	181	212	242	273	304	334	365	30
December.	31	62	90	121	151	182	212	243	274	304	335	365
