Spend More Time in the Woods and Less Time in the Office

For nearly two decades, Caribou Software has been developing and supporting efficiency-enhancing software solutions specifically for timber producers and small to midsized sawmills across the US and Canada.

We offer a suite of products designed to streamline load ticket, time sheet, and rate gement processes, improve efficiency and accuracy, and increase the overall professionalism of the 300+ loggers and mills that use our software.

In today's competitive markets, it's critical for business owners to understand the **productivity** and **profitability** of their operations, and that's exactly what our solutions are designed to help you do!

Software Solutions for Loggers

Logger's Edge: The Logger's Edge transforms and streamlines the way you manage your load tickets and time sheets, your contractor/landowner settlement creation, and your revenue reconciliation processes. Equally important, its core business reports inform key operational decision-making for owners and managers.

Mobile Time Sheet and Load Ticket Apps: Our **Loadmaster App** is designed for **load ticket entry in the woods**, either by the loader operator or a truck driver. The load is stamped with a GPS Coordinate and can be sent directly into the Logger's Edge back-office system without

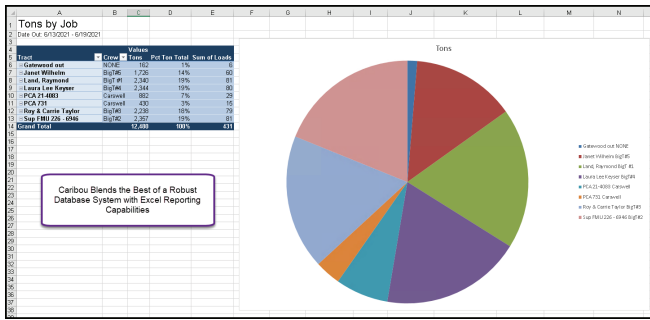

the need for rekeying! Our **E-time/Vericlock** app works in a similar way for **seamless time sheet entry by your field operators**, eliminating duplication of work and facilitating real-time data visibility.

StumpGeek: StumpGeek was originally designed by a logger in Wisconsin for use by truly small loggers and truckers moving anywhere from 5 to 30 loads a week. It's a terrific option for truly small companies that don't need the full functionality and robustness of our Logger's Edge. It offers an affordable solution for reconciling revenue, generating landowner and logger pay statements and tracking job costs and production. It even includes unique features like a "Money Log," which functions as an electronic checkbook. It's easy to use and very affordably priced for the truly small logger.

Wood Payment and Scaling Solutions for Mills

Cutting Edge: The Cutting Edge is a wood procurement and payment system for mills and bio-energy facilities. It streamlines contractor/landowner settlement creation, SFI and other certification reporting, and log inventory management. It also integrates directly with our W-Edge Weigh Scale system and our Nex-Gen Android-based Log Scaling software.

W-Edge Weigh Scale Solutions: Caribou Software's weigh scale solution integrates seamlessly with your weigh scale to capture weights directly from the scale head, improving both speed and accuracy in the yard. The weigh scale's

touch screen interface makes it easy enough that drivers can weigh themselves in and out of the yard.

Nex-Gen Scaling Software: Nex-Gen Scaling Software is an advanced, Android-based log scaling solution that integrates with our Cutting Edge to provide accurate and efficient scaling operations. It supports multiple measurement units including Scribner, Scribner Dec-C, Doyle, and International.

This suite of solutions helps mills manage their log costs proactively, reduce errors and speed up billing processes, and manage raw material more effectively.

Experience the difference that Caribou Software’s industry-proven solutions can make in your forestry operations.

The Logger’s Edge provides a single point of entry for all my load tickets and time sheets. There is no more entering and re-entering in spreadsheet after spreadsheet. Once it’s in the system, I can generate my employee and vendor pay statements, and my revenue reports with just a few clicks of the mouse. We can now complete in a day what used to take us about 2.5 days.

The system has checks in place, so if I miss something in my setup or data entry, it tells me that! I also appreciate that whenever I call, everybody there is wonderful to deal with.”
Northland Harvesting - Newberry, Michigan

“Before StumpGeek, I had no efficient way to track any of my load tickets, my production, or my pricing information. I just hoped that the mill was paying me properly and that my trucking contractors were billing me properly. It was chaos and no way to run a business. StumpGeek is great for paying my trucking contractors. It’s fast and easy to automatically create the trucker statements with just a few clicks. Plus, the software lets me see how much my own trucks haul versus my contractors, and what I make on each of those loads. The more I use it, the more I want to use it!”

~ Tibbetts Trucking Inc. - Finland, MN

Here are just a few of the customers who use our core “Edge” products:

From Woods to Office: Software Solutions for Loggers and Mills

Load Ticket and Time Tracking Made Easy, Fast, and Affordable

Caribou Software
