

LOG SCALING

In the 21st Century

Solving an Old Problem
with a Modern Handheld Computer

Introducing Log Scaling for Android

Whether you want a rugged handheld device with a physical keyboard, or you want to use an Android phone or Tablet, Caribou has you covered. Don't put it off! Now is the time to upgrade your outdated and unsupported log scaling software to a modern platform.

Our software takes advantage of the versatility and longevity of the Android O/S so you can choose the hardware that is right for you. Virtually all entry is performed with configurable "function" keys so your hands never leave the keyboard. Rugged Android handhelds let you work in the cold or in humidity.

The Handheld System can operate independently or in conjunction with Caribou's "Cutting Edge" log payment office systems. Simply download your log scale data from the handheld using a cable or over Wi-Fi from your yard. Information sent over the wireless network is available for immediate real-time import into our backend office system, or can be integrated with your own system.

Works with a
Variety of
Android Devices

Simple and Intuitive Log Entry

	SAVE/EXIT (F1)	SAVE/ADD LOG (F2)
Log #5 of 1		
<input type="checkbox"/> Fix? Product	SAW	Sawlogs
<input type="checkbox"/> Fix? Species	HEMLOCK	Hemlock
<input type="checkbox"/> Fix? Grade	1	1
<input type="checkbox"/> Fix? Quality	-	N/A
Length	16	
Small Diameter	12	
Gr Scale Vol	64	
Net Scale Vol	64	

The Log Entry Screen is clean and simple. The Tab and Function keys allow you to navigate the entry boxes with ease. You can set up quick keys to allow single character data entry. For example, you can set the 'h' key to mean Hemlock, or 's' for Sawlogs. The Gross volume is calculated from the length and diameter. You can also enter any log defect deductions.

All your log data are stored on the Handheld in a database. Log Tallies can be generated as PDF files and e-mailed or shared using today's sharing technology.

No More Swapping Around of Data Files

The Handheld System can operate independently, but works best in conjunction with Caribou's **Cutting Edge** log payment system. You download your log scale data from the Allegro 3 over Wi Fi from your log yard. Information sent over the wireless network is available for immediate real time use by your Office Staff. No more messing with thumb drives and lost cables.

From Doyle to International to Scribner Decimal C We've Got You Covered

Our scale data entry process has been refined over the years by incorporating feedback from scalers using previous versions of our software. We believe in continuous improvement in data entry efficiency and strive for it with every new version. You may find flashier software out there, but you won't find any as capable, simple to use, and supported by a team of industry experienced development and support technicians.
